SAFETY

Wiedenmann employees conduct themselves not only within the **OSHA** guidelines, but within our own stringent set of safety rules and regulations set forth in our written safety plan. We are responsive to new ideas and training that may further assist us in these areas.

All of our foremen have the OSHA 30 hour competent person certification, adult and child CPR/AED, standard first aid, and Haz-com training. We are a member of the OSHA partnership program, and the BASIF safety program. We have monthly safety inspections both shop and field by BASIF and weekly field and shop inspections by our own safety coordinator. As a member of SMACNA we have access to a full time safety coordinator that we may work with upon request.

Wiedenmann has a current Experience Modification Rating of **.79** and we will make every effort to see that your job is completed in a timely manner, exceeding your expectations of quality, and above all, safely.

If further information is required or you have any questions please contact Sam Fuller at 913-782-4900 or sfuller@wcw-son.com .
